EXPERIENCE

ChowNow, Remote — *Senior Front End Developer, Team Lead*

Jan 2021 - Present

- Led breakup of frontend monolith
- Led re-architecture of core ordering product from Single Page App to Server Rendered App via Next.js
- Led modernization of core app cloud infrastructure via Docker, AWS Fargate
- Team Lead responsible for code review and quality, organized structured workshops for junior developers
- Introduced higher code quality standards, coverage thresholds around unit testing and code complexity
- Implemented core app performance monitoring and observability via DataDog

Warby Parker, NYC — *Front End Developer*

March 2017 - December 2020

- Implemented bucket and bandit tested front-end ecommerce features in core online shopping flow via React and Node.
- Led development of customer personalization features and CSS-Only core site navigation.
- Led overhaul of site cart and checkout flow and introduction of Redux alongside introduction of contact lenses as a core product.
- Worked alongside core platform team to maintain and update custom isomorphic Node server via Hapi.js

Junior Front End Developer

September 2015 - March 2017

- Developed checkout and shopping flow features for retail sales floor applications via React.

General Assembly, NYC — *Instructor / Software Engineer*

October 2014 - September 2015

- Designed and developed Ruby on Rails applications to enhance student experience, such as a homework database, Github pull request checker and a student facing Slack bot.
